These are examples of terms used by Michel Odent in his study of the ecstatic/orgasmic states associated with different episodes of human sexual life. This book about male and female orgasms is an opportunity to convince anyone that humanity is at a turning point. Due to the improved technique of medically assisted conceptions and cesareans, the advances in anesthesiology and pharmacology, and the development of the food industry, women can now conceive a baby, give birth and feed their infant without relying on the release of 'cocktails of love hormones'. Human intelligence and ingenuity have made love hormones redundant. Let us think long-term and let us raise questions in terms of civilization. The future of humanity is at stake.
