Reviews

This book is definitely not effortless to begin on looking at but quite entertaining to read. Better than never, though I am quite late in starting reading this one. I am just easily getting a enjoyment of looking at a written ebook.

Ordinarily it is sufficient to pile the muck closely and carry the tamping on out to the very mouth of the tunnel. i i Fig. 88. --Diagram of. Wiring for Tunnel Blast TAMPING Ordinarily the word tamping is used to cover both the act of closing a bore hole and the earthy material used. A better use is to designate the act or work as Tamping and the material as Stemming. . Stemming, except for gopher holes and tunnels should be free from stone and grit. For large holes where the weight of the stemming gives the confinement, dry free running sand is good. For other work a moist, easily packed sand, clay or loam is best. Dry light material such as the Bug Dust from drills, augers or cutting machines should never be used. Good tamping is one of the prime essentials of successful blasting. Water Tamping. --When a large amount of water covers a charge of high explosives in a down hole, further tamping is sometimes omitted, as the water makes fair tamping. When the explosive used has good water resisting power and an adequate supply of water is convenient, it can be used instead of earthen tamping, even though it is not as effective. FIRING By Firing is meant the setting off or exploding of blasts. This should never be done until the blaster is sure that all charges are properly loaded and tamped and that all...
