

Seismicity Caused by Mines, Fluid Injections, Reservoirs, and Oil Extraction

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Ally Reichel)

SEISMICITY CAUSED BY MINES, FLUID INJECTIONS, RESERVOIRS, AND OIL EXTRACTION

Birkhäuser Dez 1998, 1998. Taschenbuch. Book Condition: Neu. 254x178x13 mm. Neuware - The perturbation of the earth by mankind causes earthquakes in a variety of situations. This phenomenon continues to be a major concern to engineers and scientists concerned with the mitigation of the consequences of this seismicity, as well as better understanding the processes at its origin. The present volume contains twelve papers from six countries, dealing with observations of triggered and induced seismicity in four continents. The reported cases include seismicity due to hard-rock mines, coal mines, underground research facilities for nuclear waste disposal, water injections, reservoirs, aquifers and oil fields. This volume provides case studies of previously unavailable observations of this phenomenon, investigations of the cause and source mechanism of seismic events, studies of source location distributions, determinations of seismic source parameters, cases of the use of such parameters in assessing rockburst hazard in mines, and measurements of velocity and attenuation properties of rock masses. The present collection of papers provides an excellent indication of the current state of the art and new developments in this area of research. 244 pp. Englisch.
